FEATURES

N65

The Nectre N65 features include a steel baffle with steel brick retainer and firebrick lining. This means there is more thermal mass for longer heat retention.

You're going to find the wood storage box to be extremely convenient! Vertically stacking wood in the Nectre N65 is quick and easy. This technique provides interesting flames that create a feeling of comfort and security for you and your family.

N350 AND N550

The Nectre N350 and N550 are wood-fired combination oven, cook stove & heaters with powerful heat output and stylish good looks. You'll enjoy wonderful and cozy radiant warmth, along with terrific cooking performance.

The N350 and N550 models feature a flue bypass damper. When closed, heat from the flue spills over the internal side plates of the firebox creating a convection cooking effect. It's easy to maintain consistent oven temperatures with the F° and C° thermometer.

Both combination stoves are supplied with two wire cooking racks and a cook top with two removeable cooking rings. Both models have standard stay cool spring handles on durable cast iron doors.
